DID YOU KNOW...

*Scaffolds and scaffold components shall be inspected for visible defects by a competent person **before each work shift**, and after any occurrence which could affect a scaffold's structural integrity 1926.451(f)(3)...CAN YOU COMPLY?*

Many companies are under the false impression that completion of a 10-Hour OSHA Outreach class satisfies OSHA's training requirements in full ...it does not

The Purpose of this course is to provide scaffold erectors and users with the regulations, safety guidelines and procedures needed to recognize and eliminate hazards in the field. Satisfactory completion of this course will assist you in satisfying the OSHA training requirements as defined in 29 CFR 1926.454

OBJECTIVES:

- Specify the general requirements of frame, tube & clamp, and system scaffolding.
- Determine the specific safety rules and steps associated with erection of the three scaffold types.
- Identify the major items to consider when performing a scaffold inspection.
- Specify the major elements of OSHA's Regulation 20 CFR subpart L.

There is a hands on, practical component to this class.

Instructor: Michael F. Durkee, Safety Manager/CHST,SP, Zampell

Mike has worked for Zampell for 30 years, 16 of those in a safety capacity. In 2012 he received a CHST certification by the Board of Certified Safety Professionals. Mike became a Safety and Health Specialist in 2004 from the OSHA Institute Education Center and an instructor for Scaffolding by the Scaffold Training Institute in Houston, TX in 2006.
