Instructor: Donald L. Olesen PE, CSP

Don has been in the practice of Environmental, Health and Safety for over 35 years. He has a Bachelor's degree in Industrial Technology (Safety Engineering) with a minor in Communications from Illinois State University. He also has a Master's Degree in Business Administration with an advanced certificate in Human Resource Management from Southern New Hampshire University. Don is a Registered Professional Engineer and Certified Safety Professional in Engineering Practice.

Don has held several positions in the EHS field. He has progressed from a plant safety coordinator to Corporate Director of Safety to Senior Vice President of Loss Control. Don has been an adjunct faculty member at the Harvard University School of Public Health, Keene State College, and Antioch Graduate School.

Don has been a member of the American Society of Safety Engineers since 1982 when he was the Student Chapter Vice President. His roles in the ASSE include: Boston Chapter President, first New England Area Director, Delegate to the ASSE House of Delegates, Chapter Safety Professional of the Year, two time Regional Safety Professional of the Year and he currently serves as the New England Area Director (second term).

PRE-CONSTRUCTION PLANNING

Who Should Attend?

- Project managers
- Project engineers – design, structural, electrical, civil, etc.
- Architects
- Superintendents
- Forman and Leads
- All safety personnel: directors, managers, officers, specialists, etc.

Proper construction pre-planning can mean the difference between a job that comes in on time and under budget and one that negatively impacts your reputation as a contractor. It can also mean the difference between a safe job and one that suffers serious accidents. This course addresses many concepts that will assist in protecting workers, protecting the company and significantly assisting in compliance efforts. In this 4-hour course, the instructor will provide a guide to be used in effective construction project pre-planning.

Course Topics Include:

- Timing of the planning sessions/meetings
- Who should be involved in the planning process and when
- Multi-timed planning sessions
- Major items to consider:
 - Estimating – Safety has a cost
 - Safety management needs, strategies, policies and programs
 - Site layout
 - Sub-contractor requirements
 - Specific and formal hazard identification and controls
 - Site evaluation
 - Emergency response
- Statistical analysis – Measures of success
- Motivation programs—Encourage a positive safety culture

Confirmations and directions are sent within one week of class start date.

See reverse for driving directions.
