Operators of powered industrial forklifts and aerial access equipment must be fully trained and employer certified. Employers need an effective and comprehensive training program to meet this OSHA regulation. Participants will complete formal classroom training, practical hands-on training and an evaluation.

This course is designed to meet the training requirements in the OSHA standards for this subject, although site-specific information may be added so that the unique concerns of each jobsite are covered as well. Each attendee will receive a wallet card demonstrating their successful completion.

**10 % DISCOUNT for verified members of NH HomeBuilders. Enter code NHHBA.*

AERIAL WORK PLATFORM TRAINING

COVERING SCISSOR AND BOOM LIFTS

This class has been developed to include discussions of the equipment itself, such as system of controls, hydraulics, steering mechanisms, seat fall protection and other safety equipment, as well as the environment in which the equipment may be used. Sample inspection checklists will be used. Participants will operate the equipment demonstrating knowledge and skill.

Course Topics:

- OSHA Regulations and ANSI Standards
- Equipment Specifications
- Warnings & Precautions
- Controls & Instrumentation
- Capacity & Stability
- Operating Limitations
- Load Composition
- Common Accidents
- Inspections
- Pedestrian Traffic
- Hazards & Classifications

Many companies are under the false impression that completion of a 10-Hour OSHA Outreach class satisfies OSHA's training requirements in full ...

... it does not

Instructor: Dennis Richardson, Trainer W.D. Matthews. Dennis has 20 years experience in forklift and aerial lift training through out New England. He is certified by Clark, Toyota, JLG, Genie and is an authorized OSHA outreach instructor 10hr and 30 hr.

*Confirmations and directions are sent within one week of class start date.
